

Vignesh Suresh Kumar

470-217-1987 | Atlanta, GA | vigneshsureshkumar30@gmail.com | github.com/vigneshsk17 | linkedin.com/in/vigneshsk17

EDUCATION

Georgia Institute of Technology

BS, Computer Science; GPA: 3.71; Classes: DSA, Multivariable Calculus, Linear Algebra

Atlanta, GA

Expected Dec 2025

EXPERIENCE

Humanoid Robotics Software Intern

Aug 2022 - May 2023

System Technology Works

- Planned out various movements for the humanoid robot Zeus2Q, including bipedal walking and grabbing
- Enhanced Zeus2Q's speech functionality through the use of the NVIDIA RIVA AI SDK
- Implemented user-facing ROS Python nodes to allow for future consumer interaction with Zeus2Q
- Advocated for and established improved code practices such as documentation comments and type hints

Research Assistant

Sep 2023 - Present

Fung Lab - Georgia Institute of Technology

- Collaborate with a multidisciplinary team of researchers to design and optimize graph neural networks tailored for quantum chemistry surrogate modeling
- Utilize Pytorch Geometric and Torchmetrics to preprocess chemical data and collect useful metrics
- Actively participating in weekly lab meetings to present progress updates and assist in research paper preparation

Automotive LIDAR Research Intern

Aug 2023 - Present

Georgia Institute of Technology

- Assist in development of the object detection system that underlies the movements of a four-wheeled robot
- Iterate upon ROS C++ modules for the robot's movement, LIDAR sensors, and telemetry
- Utilizing the Gazebo library to simulate the robot's processes virtually along with RViz to properly visualize collected data

Co-founder and Lead Organizer

May 2022 - Present

Horror Hacks

- Design and develop the event's official website from scratch, utilizing HTML/CSS, Javascript, and Astro to create an accessible and responsive site
- Organize and lead workshops in various programming languages and specialties, fostering skill development and creativity
- Reached 70+ high schoolers from various nationalities through utilization of social media and marketing

PROJECTS

Cubimer | Dart, Flutter, Local Storage, Cloudflare, Git | cubimer.pages.dev

Jun 2023 - Aug 2023

- Developed a multi-platform web app using the Flutter framework and each platform's local storage solution
- Hosted the web version of the app on Cloudflare Pages to allow for users to access the app on any device
- Implemented the preferred form of local storage on each platform to allow for offline access to saved scrambles

CLI Shortener | Rust, PostgreSQL, Axum, SQLx, Git

May 2023 - Jun 2023

- Developed a secure and efficient link shortener service using Rust with Axum as the web server framework
- Employed PostgreSQL as the database management system for storing link data
- Applied Rust's asynchronous capabilities to handle concurrent requests efficiently, minimizing response times

FTC Stats CSV | F#, Web scraping, Git

Aug 2022 - Sep 2022

- Created a command-line application in F# that automates web scraping of data from ftcstats.org
- Incorporated F#'s powerful web scraping and data manipulation libraries to easily and efficiently convert html table data to usable CSVs in a functional manner
- Conducted statistical analysis of generated data on 32 other robotics teams to optimize game strategy

SKILLS

Languages: Java, Python, Golang, Dart, SQL (Postgres), JavaScript, HTML/CSS, Rust, F#

Frameworks: Flutter, FastAPI, Axum, JUnit, Android, React, Astro, Svelte, SCSS, Tailwind

Developer Tools: Git, Docker, VS Code, IntelliJ, PyCharm, Goland, Vim, Neovim, Emacs

Interpersonal: Communicator, Quick Learner, Strong Work Ethic, Collaborative, Leadership

Operating Systems: MacOS, Linux, Windows
